Subject: Phthalate Certification of Xandex Ink Cartridge Materials

Xandex has received assurances from the supplier(s) of the materials used in Xandex DieMark ink cartridges, that all plastic materials used in manufacturing the cartridge, including the cartridge body, main guide parts and O-rings are phthalate free.

Xandex does not conduct independent testing of these parts, however, we are confident, based on the information we have received from our supplier(s) and our supplier qualification program, that DieMark ink cartridges are phthalate free.

Please contact Xandex Customer Service with any questions.

Sincerely,

A handwritten signature in black ink that reads "Bill Eastin". The signature is written in a cursive, slightly slanted style.
